

Thank you for your support of Insane Audio products! Below are the instructions on how to update your head unit to our latest firmware version.

Please follow the instructions below:

1. Download the software Zip file to a computer. Do not unzip the file.
2. Eject the IA NavEng GPS card from the GPS card slot. (Update will not work in SD card slot, GPS slot only)
3. Insert the IA NavEng GPS card into your microSD slot on your computer or use a USB MicroSD reader to connect to your computer.
4. Load the software onto the IA NavEng GPS card. (Do not unzip the file)
5. Insert the MicroSD card with the firmware update into the GPS card slot. Once inserted into the GPS slot, you will be prompted to install the software.
6. A prompt will appear to accept the update. Click Install. No need to check any other boxes.
7. Once installation is complete, the system will ask you to eject the IA NavEng GPS card. The unit will reboot.
8. After the unit reboots, you can reconnect the IA NavEng GPS card to your computer and delete the software update from your IA NavEng GPS card.
9. After the software has been deleted, please re-insert the IA NavEng GPS card back into the GPS slot.

We take a lot of pride in what we do here at Insane Audio and stand behind everything we build. If you ever have any questions or need any assistance whatsoever, we are always available at [support@insaneaudio.com](mailto:support@insaneaudio.com).
